

RAMTEJA REGUNTA

AI & ML Engineer | Data Analyst | Python • SQL • Machine Learning

Hyderabad, Telangana, India | +91-8919869883 | ramtejaregunta@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Aspiring AI & ML Engineer and Data Analyst with a strong academic foundation in machine learning, data analysis, and algorithmic problem-solving. Skilled in Python, SQL, and industry-standard libraries, with hands-on experience building end-to-end ML pipelines and AI-driven applications. Driven by a passion for transforming complex data into actionable insights and intelligent solutions — eager to bring technical depth, analytical rigour, and a continuous-learning mindset to a forward-thinking team.

TECHNICAL SKILLS

Programming Languages: Python, C, C++, SQL

Data Analysis & Visualization: NumPy, Pandas, Matplotlib, Seaborn, Plotly

Machine Learning & AI: PyTorch, Scikit-learn, Supervised & Unsupervised Learning, NLP, Feature Engineering, Model Evaluation

Core Competencies: Data Structures & Algorithms (DSA), Competitive Programming, Data Preprocessing, EDA, Statistical Analysis

Cloud Platforms: Amazon Web Services (AWS), Microsoft Azure - Cloud Fundamentals, Storage, and Compute Services

Developer Tools: Git, GitHub, Jupyter Notebook, Google Colab, VS Code

Relevant Coursework: DSA, DBMS, Operating Systems, OOPs

PROJECTS

Smart Mock Interview Platform

- Designed and developed an AI-powered mock interview system to evaluate user responses using machine learning and NLP techniques, delivering automated and intelligent feedback.
- Built a structured end-to-end ML pipeline covering data capture, preprocessing, feature extraction, and feedback generation based on response quality scoring.
- Integrated audio/video recording and transcript analysis to assess response quality, relevance, and communication effectiveness applied NLP for keyword extraction and sentiment analysis.

Technologies: Machine Learning, NLP, Web Technologies

IPL Win Prediction System

- Implemented a machine learning classification model to predict IPL match outcomes using historical match data spanning multiple seasons.
- Performed comprehensive data cleaning, feature engineering, and EDA to extract meaningful patterns; evaluated multiple algorithms using accuracy, precision, recall, and F1-score to select the optimal model.
- Built data visualization dashboards using Pandas and Plotly to communicate predictions and model performance insights effectively.

Technologies: Python, Pandas, NumPy, Scikit-learn, Machine Learning

Student Result Tracker

- Designed and built a Python-based application to manage, analyze, and visualize student academic performance data across subjects and semesters, with structured storage, retrieval, and result visualization.
- Focused on clean data handling, modular code design, and maintainable architecture for reliable academic tracking.

Technologies: Python, Plotly

EDUCATION

Vidya Jyothi Institute of Technology, Hyderabad

Bachelor of Technology — Information Technology

2022 – Present | Hyderabad, India

CERTIFICATIONS

- Quantitative Research Job Simulation — Forage
- Python Professional Certification
- C++ Professional Certification

ADDITIONAL INFORMATION

Languages Known: English (Professional), Telugu (Native), Hindi (Conversational)

Availability: Actively seeking full-time roles and internships. Open to immediate internship opportunities; graduating June 2026.
